DETAILED ACTION

Allowable Subject Matter

1. Claims 1-23 are allowed.
2. The following is an examiner's statement of reasons for allowance:
3. The prior art of record neither shows nor suggests a micro device feeder system with a feeder width adjustment mechanism including an angled alignment block interposed between the mounting plate and movable drive plate for adjusting the micro device feeder system to accommodate tapes with different widths. The closest prior art of record is commonly owned U.S. Patent No. 6,666,365 to Feldman. This patent is now disqualified as prior art against the claimed invention because that subject matter and the claimed invention "were, at the time the invention was made, owned by the same person or subject to an obligation of assignment to the same person" and is subject to a terminal disclaimer, overcoming the previous 103 and double patenting rejections. The next available reference, U.S. Patent No. 6,196,783 to Foster, discloses a tape feeder, including a mounting plate, input mechanism, and drive mechanism, but does not disclose or suggest and an adjustment mechanism including an angled alignment block, nor is there an obvious reason to combine such a device with Foster. Therefore, the current invention is allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
